EDUCATION

Innovate Birmingham — *Full Stack Web Development*

DECEMBER 2021 - APRIL 2022

Coding bootcamp to gain knowledge and experience building full site functionality from front-end interfaces to back-end server routing and relational database design.

UAB — *Bachelor of Science in Information Systems*

AUGUST 2012 - MAY 2017

I received a diverse education at UAB, focused on building and managing information systems in a business setting. Our education was heavily team based and I learned lifelong skills in working with a group.

EXPERIENCE

Tata Consultancy Services, Remote — *Annuities Account Rep*

OCTOBER 2020 - NOVEMBER 2021

As Third Party Administrator for TransAmerica annuities, it was our role to provide in-depth knowledge and assistance on our clients' retirement accounts so they could make the best financial decisions for themselves.

MSI Inventory Services, Birmingham AL — *Auditor*

MAY 2020 - OCTOBER 2020

Worked with on-site information systems to provide management with up to date audit trails.

Prudential Financial, Birmingham AL — *FP*

JUNE 2019 - MARCH 2020

Developed financial plans with clients specific to their needs for retirement and other savings goals.

PROJECTS

Web Portfolio — *dmann.netlify.app*

This is my portfolio built using Next.js and deployed to Netlify. The front-end uses React and showcases routing through pages, as well as an embedded projects section for some projects I've pushed to github.

PROFILE

I am a motivated individual with a passion for software development, specifically the challenge it provides and how rewarding it is to solve complex problems. I enjoy thinking outside the box and coming up with solutions that are unique to myself and my strengths and in the process learning something new every day. Personal growth is my priority and in the world of technology, this opportunity is limitless.
